LANGUAGES

Italian (Native)

English (Professional)

PRESENTATION

I have a great passion for technology and a constant desire to learn. I'm a geek when it comes to building PCs, video games, and music. I'm currently learning playing bass.

EXPERIENCE

Jr. Fronted Developer   September 2022 - January 2023

Giao Giao

I have developed advanced skills in JavaScript and Vue.js. I have contributed to improving the performance of the website and tablet application, optimizing speed and increasing conversions. I enjoy working in teams, both in the office and remotely, and have built strong and positive professional relationships.
Framework and languages: JavaScript, Vue.js, Node.js

PROJECTS

Portfolio

A personal portfolio created using HTML, CSS, and JavaScript, featuring a responsive and dynamic design. The site showcases my projects, skills, and experiences in a clear and interactive way. I focused on UI/UX to ensure smooth and modern navigation, implementing animations and interactions with JavaScript.
Framework and languages: HTML, CSS, JavaScript

Oblivion

App that helps reduce digital distractions, allowing users to focus on outdoor activities, household chores, and study/work.
The app filters notifications while still providing access to calls and music, ensuring an optimal balance between productivity and entertainment.
Framework and languages: Flutter, Dart, HTML, CSS, C++
